

## **Administration of Medications, Anti-Seizure Medication, Emergencies, Head Lice**

### **Administration of Medications**

The following policy regarding the administration of medications is applicable when the staff of Sonoma Charter School (the “School”) is responsible for the administration of, or assisting in the administration of, medication to students attending school during regular school hours, including before- or after-school programs, field trips, extracurricular and co-curricular activities, and camps or other activities that typically involve at least one overnight stay away from home, because administration of the medication is absolutely necessary during school hours and the student cannot self-administer or another family member cannot administer the medication at school.

**Requirements for Administration or Assistance:** Before the School will allow a student to carry and self administer prescription auto-injectable epinephrine, or inhaled asthma medication, or have authorized School personnel administer medications or otherwise assist a student in administering his or her medication, the School must receive a copy of the following:

- A written statement executed by the student’s authorized health care provider specifying the medication the student is to take, the dosage, and the period of time during which the medication is to be taken and a statement that the medication must be taken during regular school hours, as well as detailing the method, amount and time schedule by which the medication is to be taken;
- A written statement by the student’s parent or guardian initiating a request to have the medication administered to the student or to have the student otherwise assisted in the administration of the medication, in accordance with the authorized health care provider’s written statement. The written statement shall also provide express permission for the School to communicate directly with the authorized health care provider, as may be necessary, regarding the authorized health care provider’s written statement.
- In the cases of self-administration of asthma medication or prescription auto-injectable epinephrine, the School must also receive a confirmation from the authorized health care provider that the student is able to self-administer the medication and a written statement from the parent/guardian consenting to the student’s self-administration and releasing the School and its personnel from civil liability if the self-administering student suffers an adverse reaction by self-administering his/her medication.
- New statements by the parent/guardian and the authorized health care provider shall be required annually and whenever there is a change in the student’s authorized health care provider, or a change in the medication, dosage, method by which the medication is required to be taken or date(s), or time(s) the medication is required to be taken. If there is not a current written statement by the student’s parent or guardian and authorized

health care provider, the School may not administer or assist in administration of medication. The School will provide each parent with a reminder at the beginning of each school year that they are required to provide the proper written statements.

Parent(s)/guardian(s) of students requiring administration of medication or assistance with administration of medication shall personally deliver (or, if age appropriate, have the student deliver) the medication for administration to the Office Manager/Health Tech in the school office.

**Responses to the Parent/Guardian upon Request:** The School shall provide a response to the parent/guardian within 10 business days of receiving the request for administration and the physician statement which School employees, if any, will administer medication to the student, and what the employees of the School will do to administer the medication to the student or otherwise assist the student in the administration of the medication.

**Termination of Consent:** Parent(s)/guardian(s) of students who have previously provided consent for the School to administer medication or assist a student with the administration of medication may terminate consent by providing the School with a signed written withdrawal of consent on a form obtained from the office of the School Director.

**Authorized Personnel:** A nurse who is employed by the School and certified in accordance with Education Code section 44877 will administer or assist in administering the medication to students. If not available, a designated School employee who is legally able to and has consented to administer or assist in administering the medication to students will administer the medication or otherwise assist the students.

**Storage of Medication:** Medication for administration to students shall be maintained in the office in a locked cabinet. It shall be clearly marked for easy identification. If the medication requires refrigeration, the medication shall be stored in a refrigerator in a locked office, which may only be accessed by authorized personnel. If stored medication is unused, discontinued or outdated, the medication shall be returned to the student's parent/guardian where possible. If not possible, the School shall dispose of the medication by the end of the school year in accordance with applicable law.

**Confidentiality:** School personnel with knowledge of the medical needs of students shall maintain the students' confidentiality. Any discussions with parents/guardians and/or authorized health care providers shall take place in an area that ensures student confidentiality. All medication records or other documentation relating to a student's medication needs shall be maintained in a location where access is restricted to the School Director, the School nurse or other designated School employees.

**Medication Record:** The School shall maintain a medication record for each student that is allowed to carry and self-administer medication and for each student to whom medication is administered or other assistance is provided in the administration of medication.

The medication record shall contain the following: 1) The authorized health care provider's written statement; 2) The written statement of the parent/guardian; 3) A medication log (see below); 4) Any other written documentation related to the administration of the medication to the student or otherwise assisting the pupil in the administration of the medication.

The medication log shall contain the following information: 1) Student's name; 2) Name of the medication the student is required to take; 3) Dose of medication; 4) Method by which the pupil is required to take the medication; 5) Time the medication is to be taken during the regular school day; 6) Date(s) on which the student is required to take the medication; 7) Authorized health care provider's name and contact information; and 8) A space for daily recording of medication administration to the student or otherwise assisting the student, such as date, time, amount, and signature of the individual administering the medication or otherwise assisting in administration of the medication.

**Deviation from Authorized Health Care Provider's Written Statement:** If a material or significant deviation from the authorized health care provider's written statement is discovered, notification as quickly as possible shall be made as follows: 1) If discovery is made by a licensed health care professional, notification of the deviation shall be in accordance with applicable standards of professional practice; 2) If discovery is made by an individual other than a licensed health care professional, notification shall be given to the School Director, the student's parent/guardian, any School employees that are licensed health care professionals and the student's authorized health care provider.

### **Specialized Physical Health Care Services for Individuals with Exceptional Needs:**

**Authorized Personnel:** The following individuals may assist students with exceptional needs who require specialized physical health care services during the regular school day:

- Qualified persons who possess an appropriate credential issued pursuant to Education Code sections 44267 or 44267.5
- Qualified designated school personnel trained in the administration of specialized physical health care if they perform those services under the supervision, pursuant to 5 C.C.R. § 3051.12, of a credentialed school nurse, public health nurse or licensed physician and surgeon and the services are determined by the credentialed school nurse or licensed physician and surgeon, in consultation with the physician treating the pupil, to include all of the following:
  - Routine for the pupil;
  - Pose little potential for harm for the pupil;
  - Performed with predictable outcomes, as defined in the Individualized Education Program of the pupil;

- Does not require a nursing assessment, interpretation, or decision making by the designated school personnel
- Persons providing specialized physical health care services for students with exceptional needs shall demonstrate competence in basic cardiopulmonary resuscitation and shall be knowledgeable of the emergency medical resources available in the community in which the services are performed.

Specialized health care or other services for students with exceptional needs that require medically related training shall be provided pursuant to the procedures identified in this policy generally.

Specialized physical health care services include catheterization, gastric tube feeding, suctioning or other services that require medically related training.

## I. Emergencies

### A. First Aid and CPR

All teachers are certified in first aid and CPR and are re-certified every other year in either first aid or CPR. Every classroom has a First Aid Kit containing appropriate supplies. First aid will be administered whenever necessary by trained staff members. When necessary, the appropriate emergency personnel will be called to assist.

### B. Resuscitation Orders

School employees are trained and expected to respond to emergency situations without discrimination. If any student needs resuscitation, trained staff shall make every effort to resuscitate him/her. The School does not accept or follow any parental or medical “do not resuscitate” orders. School staff should not be placed in the position of determining whether such orders should be followed. The School Director, or his/her designee, shall ensure that all parents/guardians are informed of this policy.

### C. Emergency Contact Information

For the protection of a student’s health and welfare, the School shall require the parent/guardian(s) of all students to keep current with the School emergency information including the home address and telephone number, business address and telephone number of the parent/guardian(s), and the name, address and telephone number of a relative or friend who is authorized to care for the student in any emergency situation if the parent/guardian cannot be reached. Education Code § 49408.

### D. Emergency Aid to Students with Anaphylactic Reaction

The School will provide emergency epinephrine auto-injectors to trained School personnel and those trained personnel may use those epinephrine auto-injectors to provide emergency medical

aid to persons suffering from an anaphylactic reaction. The training provided to School personnel shall be in compliance with the requirements of Education Code section 49414 and any regulations promulgated in line therewith.

Trained School personnel may immediately administer an epinephrine auto-injector to a person suffering, or reasonably believed to be suffering, from an anaphylaxis reaction at School or a School related activity when a physician is not immediately available.

For purposes of this policy, “anaphylaxis” means a potentially life-threatening hypersensitivity to a substance. Symptoms of anaphylaxis may include shortness of breath, wheezing, difficulty breathing, difficulty talking or swallowing, hives, itching, swelling, shock or asthma. Causes of anaphylaxis may include, but are not limited to, an insect sting, food allergy, drug reaction and exercise.

## **II. Head Lice**

To prevent the spread of head lice infestations, School personnel shall report all suspected cases of head lice to the School nurse, or designee, as soon as possible. The nurse, or designee, shall examine the student and any siblings of affected students or members of the same household in accordance with the School’s health examination policy. If nits or lice are found, the student(s) shall be excluded from attendance and parents/guardians informed about recommended treatment procedures and sources of further information.

In the event of one or more persons infested with lice, an exposure notice with information about head lice shall be sent home to all parents/guardians of the students that have been exposed to the head lice.

School personnel shall maintain the privacy of students identified as having head lice and excluded from attendance.

Excluded students may return to School when reexamination by the nurse, a designee, or other authorized health care representative shows that all nits and lice have been removed. After returning, the student may be reexamined by the nurse as appropriate to ensure that re-infestation has not occurred.
